

We have noticed over the last year since we have replaced the track and added a fence to protect it, thus not allowing spectators on the track for football games; our football grandstand has filled up more. While it has not been to capacity yet, we have heard our spectators say they want more space between them and the visiting team's fans for a variety of reasons. In hearing this desire; and knowing our baseball bleachers are fairly old and not up to current code, we have purchased some additional aluminum bleachers. The new bleachers are portable so we can move them from the baseball field to the track/football field and back fairly easily. We are hoping to have the new bleachers assembled for the next football game, so please come on out and cheer on your Cornell Chiefs!
