

The next few months we will begin the process of determining the future of our MS/HS facility. At the (M) August 26<sup>th</sup> Board of Education Meeting we will hear from SitelogIQ and on (M) September 23<sup>rd</sup> we will hear from CESA 10. Both board meetings will be held at 5:00 p.m. in the MS/HS IMC so that anyone who wishes to go on a facility walk through after the meeting can do so. Each of these companies will go through the process that they would use in gathering community input to determine a recommendation to the Board of Education.

The Board of Education will decide at their October 28<sup>th</sup> meeting which company they will use for this community engagement process and potential remodeling and/or construction. Since this entire process is going to be community driven, I invite and hope to see several people at the August and September Board of Education Meetings to ask questions of the companies and provide input to the Board before their October meeting as to which company they should hire.

Administratively, Mr. Braaten and I have produced a conservative starting point as to what we would like to see for a facility. However, a facility is a long-term decision that the community needs to determine through a referendum. There will be people that want no changes, few changes, major remodeling, building a basic school to building an extravagant facility that will be in the community long after all of us have passed. This is a major decision I hope you want to be involved with and if nothing else, it is interesting to hear from companies how and why they implement this process.
